Physical Review Letters • Physical Review • Reviews of Modern Physics • PhysRev

Dear Author,

We are pleased to inform you that the Letter

Integrability of a globally coupled complex Riccati array: Quadratic integrate-and-fire neurons, phase oscillators, and all in between

Rok Cestnik and Erik A. Martens  
Phys. Rev. Lett. **132**, 057201 (2024)

Published 29 January 2024

has been highlighted by the editors as an Editors' Suggestion. Publication of a Letter is already a considerable achievement, as *Physical Review Letters* accepts fewer than 1/5 of submissions, and is ranked first among physics and mathematics journals by the Google Scholar five-year h-index. A highlighted Letter has additional significance, because only about one Letter in six is highlighted as a Suggestion due to its particular importance, innovation, and broad appeal. Suggestions are downloaded more than twice as often as the average Letter, and receive substantially more press coverage. Suggestions are cited at roughly twice the rate of nonhighlighted Letters. More information about our journal and its history can be found on our webpage [prl.aps.org](http://prl.aps.org).

Yours sincerely,

Hugues Chaté  
Lead Editor  
*Physical Review Letters*

Robert Garisto  
Managing Editor
